

# Target Market Determination – HSBC Global Infrastructure Equity Fund (Hedged)

## Legal disclaimer

This Target Market Determination (TMD) is required under section 994B of the *Corporations Act 2001* (Cth) (**the Act**). It sets out the class of consumers for whom the product, including its key attributes, would likely be consistent with their likely objectives, financial situation and needs. In addition, the TMD outlines the triggers to review the target market and certain other information. It forms part of Copia Investment Partners Ltd's design and distribution arrangements for the product.

This document is **not** a product disclosure statement and is **not** a summary of the product features or terms of the product. This document does not take into account any person's individual objectives, financial situation or needs. Persons interested in acquiring this product should carefully read the Product Disclosure Statement (PDS) for HSBC Global Infrastructure Equity Fund (Hedged) before making a decision whether to buy this product.

## Target Market Summary

This product is likely to be appropriate for a consumer seeking income and capital growth to be used as a satellite allocation within a portfolio where the consumer has a minimum investment timeframe of 5 years, very high-high risk/return profile and needs daily access to capital.

## Fund and Issuer identifiers

Issuer	Copia Investment Partners Ltd
Issuer ABN	22 092 872 056
Issuer AFSL	229316

APIR Code	OPS8578AU
ISIN Code	AU60OPS85785
Market Identifier Code	NA

<b>Product Exchange code</b>	NA
<b>Date TMD approved</b>	2 December 2024
<b>TMD Version</b>	2
<b><i>TMD Status</i></b>	Current

## Description of Target Market

This part is required under section 994B(5)(b) of the Act.

### TMD indicator key

The Consumer Attributes for which the product is likely to be appropriate have been assessed using a red/amber/green rating methodology with appropriate colour coding:

In target market	See issuer instructions	Not considered in target market
------------------	-------------------------	---------------------------------

### Instructions

In the tables below, Column 1, Consumer Attributes, indicates a description of the likely objectives, financial situation and needs of the class of consumers that are considering this product. Column 2, TMD indicator, indicates whether a consumer meeting the attribute in column 1 is likely to be in the target market for this product.

Generally, a consumer is unlikely to be in the target market for the product if:

- **one or more** of their Consumer Attributes correspond to a **red** rating, or
- **three or more** of their Consumer Attributes correspond to an **amber** rating.

### Investment products and diversification

A consumer or consumers may intend to hold a product as part of a diversified portfolio (typically with an intended product use of satellite/small allocation or core component). In such circumstances, the appropriateness of the product should be assessed in relation to the relevant portion of the portfolio, rather than in relation to the consumer's portfolio as a whole. For example, a consumer may wish to construct a conservative portfolio with a satellite/small allocation to growth assets. In this case, it may be likely that a product with a High or Very High risk/return profile is or may be consistent with the consumer's objectives for that allocation notwithstanding that the overall risk/return profile of the consumer as a whole is Low or Medium. In making this assessment, distributors should consider all features of a product including its key attributes, and the size of any proposed allocation to the product as a

proportion of the consumer's overall portfolio.

<b>Consumer Attributes</b> [A description of the likely objectives, financial situation and needs of the class of consumers in the target market]	<b>TMD Indicator</b>	<b>Product description including key attributes</b> [A description of the product, including its key attributes, i.e., product terms, features and attributes that affect the TMD]
<b>Consumer's investment objective</b>	<b>TMD Indicator</b>	<b>Product description including key attributes</b>
Capital Growth	In target market	The investment objective is to provide long term capital growth and income by investing in a concentrated, globally diversified portfolio of listed infrastructure securities.  The Fund seeks to deliver returns that outperform the Dow Jones Brookfield Global Infrastructure Index (Hedged to AUD) by 2% p.a. (after fees) over a rolling five year period.  Investing in this Fund does not, however, guarantee a profit, income from distributions or protect against loss.
Capital Preservation	Not considered in target market	
Capital Guaranteed	Not considered in target market	
Income Distribution	Not considered in target market	
<b>Consumer's intended product use</b>	<b>TMD Indicator for product</b>	<b>Product description including key attributes</b>
Solution/Standalone (75-100%)	Not considered in target market	The Fund will invest in a diversified portfolio of listed infrastructure securities across both developed and developing equity markets. It is actively managed and will usually hold between 30 and 45 securities.  The Fund typically invests within the following guidelines: <ul style="list-style-type: none"> <li>- global listed infrastructure equities – 90 – 100%</li> <li>- cash and cash equivalents – 0 -10%</li> </ul> The Fund has a Medium portfolio diversification.
Core Component (25-75%)	Not considered in target market	
Satellite/small allocation (<25%)	In target market	
<b>Consumer's investment timeframe</b>	<b>TMD Indicator</b>	<b>Product description including key attributes</b>

Minimum investment timeframe	In target market	Investment time frame as disclosed in the PDS is at least 5 years.
<b>Consumer's Risk (ability to bear loss) and Return profile</b>	<b>TMD Indicator</b>	<b>Product description including key attributes</b>
Extremely high	Not considered in target market	The Fund's risk rating as disclosed in the PDS is high.
Very high	In target market	The consumer is higher risk in nature and can accept higher potential losses (e.g. has the ability to bear up to 6 negative returns over a 20 year period (SRM 6)) in order to target a higher target return profile. Consumer typically prefers predominantly growth assets such as shares, property and alternative assets with only a smaller or moderate holding in defensive assets such as cash and fixed income.
High	In target market	
Medium	Not considered in target market	
Low	Not considered in target market	
<b>Consumer's need to withdraw money</b>	<b>TMD Indicator</b>	
Daily	In target market	Under normal circumstances the permitted withdrawal frequency is daily.
Weekly	In target market	If your withdrawal request is received and identified (and accepted) by us:  <ul style="list-style-type: none"> <li>- Before 2pm on any business day – it will generally be processed using the exit price next calculated for that business day</li> <li>- After 2pm on any business day (but before the next processing cut-off time) – it will generally be processed using the exit price calculated for the next business day</li> </ul>

Annually or longer	In target market	

## Appropriateness

Note: This section is required under RG 274.64–66

The Issuer has assessed the product and formed the view that the product, including its key attributes, is likely to be consistent with the likely objectives, financial situation and needs of consumers in the target market as described above, as the features of this product in Column 3 of the table above are likely to be suitable for consumers with the attributes identified with a green TMD Indicator in Column 2.

### Distribution conditions/restrictions

This part is required under section 994B(5)(c) of the Act.

Distribution Condition	Distribution Condition Rationale	<i>applicable</i>
All distributors are required to notify CIPL about any significant dealing in a product inconsistent with this TMD	994E(1) A person who makes a target market determination for a financial product must take reasonable steps that will, or are reasonably likely to, result in retail product distribution conduct in relation to the product (other than excluded conduct) being consistent with the determination.	Financial planners

Review triggers
This part is required under section 994B(5)(d) of the Act.
Material change to key attributes, fund investment objective and/or fees.
Change in management fees, including change to performance fee calculation methodology
Material deviation from benchmark / objective over sustained period.
Exceed Standard Risk Measure (SRM6)
Unable to meet redemption timeframe as set out in the PDS
Key attributes have not performed as disclosed by a material degree and for a material period.
Three or more Significant Dealing reports caused by the same product attribute
Determination by the issuer of an ASIC reportable Significant Dealing
Three or more consumer complaints caused by the same product attribute
The use of Product Intervention Powers, regulator orders or directions that affects the product.

Mandatory review periods	
This part is required under section 994B(5)(e) and (f) of the Act.	
<b>Review period</b>	<b>Maximum period for review</b>

Initial review	1 year and 3 months
Subsequent review	3 years and 3 months

<b>Distributor reporting requirements</b>		
This part is required under section 994B(5)(g) and (h) of the Act.		
<b>Reporting requirement</b>	<b>Reporting period</b>	<b>Which distributors this requirement applies to</b>
Complaints (as defined in section 994A(1) of the Act) relating to the product design, product availability and distribution. The distributor should provide all the content of the complaint, having regard to privacy.	Within 10 business days following end of calendar quarter	All distributors
Significant dealing outside of target market, under s994F(6) of the Act. See Definitions for further detail.	As soon as practicable but no later than 10 business days after distributor becomes aware of the significant dealing.	All distributors
To the extent a distributor is aware of dealings outside the target market these should be reported to the issuer, including reason why acquisition is outside of target market, and whether acquisition occurred under personal advice.	Within 10 business days following end of calendar quarter	All distributors

Distributors must report to Copia Investment Partners Ltd using the method specified on this website: <https://www.copiapartners.com.au/target-market-determinations>

This link also provides contact details relating to this TMD for Copia Investment Partners Ltd.

# Definitions

Term	Definition
<b>Consumer's investment objective</b>	
Capital Growth	The consumer seeks to invest in a product designed to generate capital return. The consumer prefers exposure to growth assets (such as shares or property) or otherwise seeks an investment return above the current inflation rate.
Capital Preservation	The consumer seeks to invest in a product to reduce volatility and minimise loss in a market down-turn. The consumer prefers exposure to defensive assets (such as cash or fixed income securities) that are generally lower in risk and less volatile than growth investments.
Capital Guaranteed	The consumer seeks a guarantee or protection against capital loss whilst still seeking the potential for capital growth (typically gained through a derivative arrangement). The consumer would likely understand the complexities, conditions and risks that are associated with such products.
Income Distribution	The consumer seeks to invest in a product designed to distribute regular and/or tax-effective income. The consumer prefers exposure to income-generating assets (typically, high dividend-yielding equities, fixed income securities and money market instruments).
<b>Consumer's intended product use</b>	
Solution/Standalone (75-100%)	The consumer intends to hold the investment as either a part or the majority (up to 100%) of their total <i>investable assets</i> (see definition below). The consumer typically prefers exposure to a product with at least High <i>portfolio diversification</i> (see definitions below).
Core Component (25-75%)	The consumer intends to hold the investment as a major component, up to 75%, of their total <i>investable assets</i> (see definition below). The consumer typically prefers exposure to a product with at least Medium <i>portfolio diversification</i> (see definitions below).
Satellite (<25%)	The consumer intends to hold the investment as a smaller part of their total portfolio, as an indication it would be suitable for up to 25% of the total <i>investable assets</i> (see definition below). The consumer is likely to be comfortable with exposure to a product with Low <i>portfolio diversification</i> (see definitions below).
Investable Assets	The consumer intends to hold the investment as either a part or the majority (up to 100%) of their total <i>investable assets</i> (see definition below). The consumer typically prefers exposure to a product with at least High <i>portfolio diversification</i> (see definitions below).
<b>Portfolio diversification (for completing the key product attribute section of consumer's intended product use)</b>	

Low	Single asset class, single country, low or moderate holdings of securities - e.g. high conviction Aussie equities.
Medium	1-2 asset classes, single country, broad exposure within asset class, e.g. Aussie equities “All Ords”.
High	Highly diversified across either asset classes, countries or investment managers, e.g. Australian multi-manager balanced fund or global multi-asset product (or global equities).
<b>Consumer’s intended investment timeframe</b>	
Minimum	The minimum suggested timeframe for holding the product. Typically, this is the rolling period over which the investment objective of the product is likely to be achieved.
<b>Consumer’s Risk (ability to bear loss) and Return profile</b>	
<p>Issuers should undertake a comprehensive risk assessment for each product. The FSC strongly recommends adoption of the Standard Risk Measure (<i>SRM</i>) to calculate the likely number of negative annual returns over a 20 year period, using the guidance and methodology outlined in the <i>Standard Risk Measure Guidance Paper For Trustees</i>. SRM is not a complete assessment of risk and potential loss. For example, it does not detail important issues such as the potential size of a negative return or that a positive return could still be less than a consumer requires to meet their investment objectives/needs. Issuers may wish to supplement the SRM methodology by also considering other risk factors. For example, some products may use leverage, derivatives or short selling, may have liquidity or withdrawal limitations, or otherwise may have a complex structure or increased investment risks, which should be documented together with the SRM to substantiate the product risk rating.</p>	
Extremely High	<p>The consumer has an extremely high risk appetite, can accept significant volatility and losses, and seeks to obtain accelerated returns, potentially in a short timeframe.</p> <p>The consumer seeks extremely high risk, speculative or complex products which may have features such as significant use of derivatives, leverage or short positions or may be in emerging or niche asset classes (for example, crypto-assets or collectibles).</p>
Very high	<p>The consumer has a more aggressive or very high risk appetite, seeks to maximise returns and can accept higher potential losses (e.g. has the ability to bear 6 or more negative returns over a 20 year period (SRM 7) and possibly other risk factors, such as leverage).</p> <p>Consumer typically prefers growth assets such as shares, property and alternative assets.</p>
High	<p>The consumer is higher risk in nature and can accept higher potential losses (e.g. has the ability to bear up to 6 negative returns over a 20 year period (SRM 6)) in order to target a higher target return profile.</p> <p>Consumer typically prefers predominantly growth assets such as shares, property and alternative assets with only a smaller or moderate holding in defensive assets such as cash and fixed income.</p>
Medium	<p>The consumer is moderate or medium risk in nature, seeking to minimise potential losses (e.g. has the ability to bear up to 4 negative returns over a 20 year period (SRM 3 to 5)) and comfortable with a moderate target return profile.</p>

	Consumer typically prefers a balance of growth assets such as shares, property and alternative assets and defensive assets such as cash and fixed income.
Low	The consumer is conservative or low risk in nature, seeks to minimise potential losses (e.g. has the ability to bear up to 1 negative return over a 20 year period (SRM 1 to 2)) and is comfortable with a low target return profile. Consumer typically prefers defensive assets such as cash and fixed income.
<b>Consumer's need to withdraw money</b>	
Issuers should consider in the first instance the redemption request frequency under ordinary circumstances. However, the redemption request frequency is not the only consideration when determining the ability to meet the investor's requirement to access capital. To the extent that the liquidity of the underlying investments or possible liquidity constraints (e.g. ability to stagger or delay redemptions) could impact this, this is to be taken into consideration in completing this section.	
Daily/Weekly/Monthly/Quarterly/ Annually or longer	The consumer seeks to invest in a product which permits redemption requests at this frequency under ordinary circumstances and the issuer is typically able to meet that request within a reasonable period.
<b>Distributor Reporting</b>	
Significant dealings	<p>Section 994F(6) of the Act requires distributors to notify the issuer if they become aware of a significant dealing in the product that is not consistent with the TMD. Neither the Act nor ASIC defines when a dealing is 'significant' and distributors have discretion to apply its ordinary meaning.</p> <p>The issuer will rely on notifications of significant dealings to monitor and review the product, this TMD, and its distribution strategy, and to meet its own obligation to report significant dealings to ASIC.</p> <p>Dealings outside this TMD may be significant because:</p> <ul style="list-style-type: none"> <li>• they represent a material proportion of the overall distribution conduct carried out by the distributor in relation to the product, or</li> <li>• they constitute an individual transaction which has resulted in, or will or is likely to result in, significant detriment to the consumer (or class of consumer).</li> </ul> <p>In each case, the distributor should have regard to:</p> <ul style="list-style-type: none"> <li>• the nature and risk profile of the product (which may be indicated by the product's risk rating or withdrawal timeframes),</li> <li>• the actual or potential harm to a consumer (which may be indicated by the value of the consumer's investment, their intended product use or their ability to bear loss), and</li> <li>• the nature and extent of the inconsistency of distribution with the TMD (which may be indicated by the number of red or amber ratings attributed to the consumer).</li> </ul> <p>Objectively, a distributor may consider a dealing (or group of dealings) outside the TMD to be significant if:</p>

	<ul style="list-style-type: none"><li>• it constitutes more than half of the distributor's total retail product distribution conduct in relation to the product over the reporting period,</li><li>• the consumer's intended product use is <i>Solution / Standalone</i>, or</li><li>• the consumer's intended product use is <i>Core component</i> and the consumer's risk (ability to bear loss) and return profile is <i>Low</i>.</li></ul>
